Our use of recruitment matching AI technology

We use an AI-powered tool, provided by Eightfold AI, Inc. in our recruitment process to help us in providing you the ability to view the most relevant jobs that are matched to your skills and experience.

This AI tool also assists our recruiters in assessing and evaluating your job application. This tool is a matching model based on factors such as the skills specified in the job description and specific selection criteria our recruitment teams have configured. We do not make decisions about Applicants solely based on the results of the matching model.

While we are confident that our technology works and that it can provide you significant benefits, we understand that not everyone is comfortable with the use of matching AI for recruitment purposes. If you have any questions about this, or would like to request an alternative selection process, please contact us at ApplyAssistance@fortive.com

Where do we store your personal data?

Your personal data may be disclosed to our recruiters and service providers based in the U.S as well as other Fortive affiliates. When we transfer your personal data to recipients located outside of Australia, we will take reasonable steps to ensure that the receiving entity does not breach applicable privacy and data protection laws.

How do we keep your personal data secure?

We ensure the security of your personal data by implementing a specific set of technical and organizational security measures that are based on controls that call for the use of encryption, firewalls, and other measures that ensure we provide a level of security appropriate to the risk presented by a particular situation.

We also take steps to ensure all our subsidiaries, agents, affiliates, and suppliers employ adequate levels of security.
